Certain important actions that doesn't require the user to login are accomodated here

Dashboard

Considering the Mammoth of features ICICI has to offer, it was necessary to have a search clearly visible upfront. The user can not only type in his search query but also voice input them

Our goals were clear. Viewing "Account Balance" being the most used feature on a mobile banking app, we wanted it upfront on the dashboard. But not all users are comfortable showing their balance big and bold on the dashboard (due to privacy reasons). Hence we added one more simple but effective step, "tap to view balance".

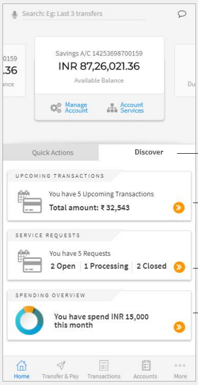
Help is always within reach

Holistic view of the products / services owned by a user. Research findings suggestes that most users own a single product from a bank, primarily a savings bank account hence I have tried to lay more emphasis on users primary engagement rather than showing all the product variants upfront for users to choose from.

Quickly manage multiple accounts

What can be more simpler than showing upfornt the actions a user would likely perform. The options shown under 'Top Activities' will be based on the most frequent activities performed by each user.



Search: Eg: Last 3 transfers

More

This section would focus on analytics, suggestions and Tips based on the tasks and actions the user has already performed. This would increase the user engagement and build a sense that the bank is smart and it understands the user.

'Discover' sections comprise of following sub sections :

Upcoming Transaction feed - Prediction of the transactions based on user's credit cycle and usage pattern of various services.

Service Requests - Users can track their requests like New ATM Card, Check Book etc.

Spending Overview - Summary and Analysis of the spending

Offers - Users can track their requests like New ATM Card, Check Book etc.

Tips for you - Suggestions that can help the user to spend wisely. This can be a place to cross-sell other products like credit cards

Get a Fixed Deposit (FD) account

Looking for a risk free way to increase your money?

Fixed deposit is a financial instrument that pays a fixed rate of interest until a given maturity date.

Calculate FD

Assured returns

- You get what you are promised
- The returns are generally over and above the returns offered by a savings bank account

Manages risk

- Mutual funds, gold ETF's, ULIP's are volatile in nature hence risky
- FDs are the best in managing that kind of risk when you are planning for long-term financial goals of your life

Help during emergencies

- You can take a loan against your fixed deposits
- Banks mostly give loans ranging from 60% to 90% of the deposits

Apply For Fixed Deposit (FD)

Here the user can get a quick glance at all the bills that are upcoming and plan accordingly
